Autoline E-Mobility Private Limited

Notes forming part of financial statements as at March 31, 2025

NOTES	PARTICULARS
1	**Company Overview** **General Information:** Autoline E-Mobility Private Limited ('The Company') is engaged in the business of Manufacturing & Assembling of Electric Bicycles & Scooters. The Company has one office in India and sells primarily in India. The Company's Corporate Identification Number (CIN) is **U29200PN2022PTC209074**. The Board of Directors have authorized to issue these financial statements on May 22, 2025.
2	**MATERIAL ACCOUNTING POLICIES**
2.1	**Basis of preparation of financial statements:** **(i) Compliance with Ind AS** This note provides a list of the material accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act and read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 as amended and Companies (Indian Accounting Standards) Amendment Rules, 2016 and relevant amendment rules issued thereafter. Accordingly, the Company has prepared these Standalone Financial Statements which comprise the Balance Sheet as at 31 March, 2025, the Statement of Profit and Loss for the year ended 31 March 2025, the Statement of Cash Flows for the year ended 31 March 2025 and the Statement of Changes in Equity for the year ended as on that date, and accounting policies and other explanatory information (together hereinafter referred to as financial statements). The financial statements were authorized for issue by the Company's Board of Directors on May 22, 2025. **(ii) Basis of preparation** The financial statements have been prepared on a historical cost basis, except for the following items: • Certain financial assets and liabilities (including derivative instruments) that are measured at fair value. • Net defined benefit (asset)/ liability – present value defined benefit obligations less fair value of plan assets. **(iii) Functional and presentation currency** These financial statements are presented in Indian Rupees, which is also the Company's functional currency. All amounts have been rounded off to the nearest lakh except share data, unless otherwise indicated.

Sharp & Tannan Associates Chartered Accountants ICAI Regn.No. 109983W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nighojewadi CHAKAN

2.2 **Revenue recognition:**

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. Revenue is reduced for estimated customer returns, rebates, and other similar allowances.

The Company applies the five-step approach for recognition of revenue:
- Identification of contract(s) with customers.
- Identification of the separate performance obligations in the contract.
- Determination of transaction price.
- Allocation of transaction price to the separate performance obligations; and
- Recognition of revenue when (or as) each performance obligation is satisfied.

The Company generates revenue principally from,

Sale of Products:

The Company is engaged in the business of manufacturing and assembling E-Cycle & E-Scooter. The Company recognizes revenue when 'control' of the promised goods underlying the particular performance obligation is transferred to the customer in an amount that reflects the consideration it expects to receive in exchange for those goods. Control of products passes to the customers at a point in time which is usually upon delivery of goods to the customer / carrier. Revenue is recognized at that point in time. Revenue excludes taxes collected from customers on behalf of the government.

Other Income:

Interest Income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Dividend Income:

Dividend income is recognized when the Company's right to receive is established by the reporting date.

2.3 **Current and Non-current classification**

The company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realized within twelve months after the reporting period, or
- Cash or Cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

Sharp & Tannan Associates ICAI Regn.No. 109983W S&TA Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in a normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled in twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability.

The company classifies all other liabilities as non-current assets and liabilities, respectively.

The Operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The company has identified twelve months as its normal operating cycle.

2.4 Fair Value Measurement

The Company measures financial instruments at fair value on initial recognition. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.
The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Sharp & Tannan Associates Chartered Accountants ICAI Regn.No. 109983W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as properties and unquoted financial assets. Involvement of external values is decided upon annually by the management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.5 Property, plant, and equipment:

Property, plants, and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company.

Depreciation methods estimated useful lives and residual value.
Depreciation is provided on a pro-rata basis on the straight-line method over the estimated useful lives of the assets which in certain cases may be different than the rate prescribed in Schedule II to the Companies Act, 2013, in order to reflect the actual usages of the assets.

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Asset Useful Life

Computers	3 Years
Software	6 Years
Office Equipments	5 Years
Furniture & Fittings	10 Years

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are recognized as income or expense in the statement of profit and loss.

Sharp & Tannan Associates ICAI Regn.No. 109983W S&TA Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Tanukarwadi CHAKAN PUNE-410501

2.6	**Intangible asset:** Intangible Assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight-line basis over their estimated useful lives. The amortization period and amortization method are reviewed at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognized as income or expense in the Statement of Profit and Loss. Internally generated intangible asset Research costs are charged to the statement of Profit and Loss in the year in which they are incurred. Product development costs incurred on electric two-wheeler are recognized as intangible assets, when feasibility has been established, the Company has committed technical, financial and other resources to complete the development and it is probable that asset will generate future economic benefits. The cost of an internally generated intangible asset is the sum of directly attributable expenditure incurred from the date when the intangible asset first meets the recognition criteria to the completion of its development. Product development costs is amortized over the life of the related product, being a period of 24 months to 120 months. Product development expenditure is measured at cost less accumulated amortization and impairment, if any. Amortization is not recorded on product in progress until development is complete. De-recognition of intangible assets An item of intangible assets is derecognized on disposal or when fully amortized and no longer in use. Any gain or loss arising from de-recognition of an item of intangible assets is included in profit or loss.
2.7	**Borrowings:** Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates. Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

Shah & Taraporewala Associates Chartered Accountants ICAI Regn.No. 109983W S&TA

AUTOTHREE E-MOBILITY PRIVATE LIMITED Regd. office S. No. 313/314 Nanekarwadi CHAKAN PUNE-410501

	Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled, or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other income / expenses.
2.8	**Borrowing Cost:** General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowing pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

2.9	**Employee benefits:** **(i) Short-term obligations** Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet. **(ii) Other long-term employee benefit obligations** The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognized in profit or loss. The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur. **(iii) Post-employment obligations** The Company operates the following post-employment schemes: (a) Defined benefit plans such as gratuity; and (b) Defined contribution plans. **(a) Defined benefit plans** Gratuity obligations: The liability or asset recognized in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

ICAI Regn.No. 109983W SRTA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in the employee benefit expense in the statement of profit and loss.

Remeasurements gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet. Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

(b) Defined contribution plans

A defined contribution plan is a post-employment benefit under which an entity pays a specific contribution to a separate entity and has no obligation to pay any further amounts. Retirement benefits in the form of provident fund and superannuation fund are defined contribution schemes and the contributions are charged to the statement of profit and loss during the period in which the employee renders the related service. The Company has no obligation other than the contribution payable to these funds. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available.

(iv) Termination Benefits

Termination benefits in the nature of voluntary retirement benefits are recognized as an expense when as a result of a past event, the Company has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(v)Employee State Insurance

Contribution towards Employee State insurance for certain employees is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis.

2.10 Financial instruments

(i) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss) (FVTOCI / FVTPL), and
- Those measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

Sharp & Associates Chartered Accountants ICAI Regn.No. 109983W SATA

Mobility Private Limited Head office Chakan

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held- for- trading, or it is a derivative or it is designated as such on initial recognition.

(ii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Subsequent measurement of debt instruments depends on the Company's business models for managing the assets and the cash flow characteristics of the assets. All the debt instruments held by the Company are classified in "Amortized Cost "measurement category.

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

(iii) Impairment of financial assets

The Company assesses on a forward-looking basis the expected credit losses associated with its assets carried at amortized cost and debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. How the Company determines whether there has been a significant increase in credit risk.
For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognized from initial recognition of the receivables.

(iv) Derecognition

A financial asset is derecognized only when.

- The Company has transferred the rights to receive cash flows from the financial asset or
- Retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has. Transferred substantially all risks and rewards of ownership of the financial asset. In Such cases, the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized.

Shah & Tannan Associates Chartered Accountants ICAI Regn.No. 109883W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

	Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognized if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset. On de-recognition of a financial asset, the difference between the asset's carrying amount and the sum of consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income, if any, is recognized in the Statement of Profit or Loss if such gain or loss would have otherwise been recognized in profit or loss on disposal of the financial asset. The Company derecognizes financial liability when its contractual obligations are discharged, cancelled, or expire.
2.11	**Offsetting financial instruments:** Financial assets and liabilities are offset, and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the group or the counterparty. **Impairment of non-financial assets:** The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates that the assets' recoverable amount. An assets' recoverable amount is the higher of an asset's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset unless the asset does not generate cashflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and it is written down to its recoverable amount. In assessing value in use, the estimated future cashflows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risk specific to the asset. In determining fair value less cost of disposal, recent market transactions are taken in account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share price for publicly traded entities or other available fair value indicators
2.12	**Cash and cash equivalents:** For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Sharp & Tannan Associates Chartered Accountants ICAI Regn.No. 109983W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

2.13	**Trade receivables:** 1. Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. 2. Trade receivables are measured at their transaction price unless it contains a significant financing component or pricing adjustments embedded in the contract. 3. The impairment provisions for trade receivables are based on assumptions about the risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.
2.14	**Trade and other payables:** These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.
2.15	**Share capital:** Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.
2.16	**Earnings per share:** **(i) Basic earnings per share** Basic earnings per share is calculated by dividing: • the profit attributable to owners of the company • By the weighted average number of equities shares outstanding during the financial year. **(ii) Diluted earnings per share** Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account: • the after-income tax effect of interest and other financing costs associated with dilutive potential equity shares, and • The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.
2.17	**Income tax:** **<u>Taxation Current and Deferred tax</u>** The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Sharma & Tandon Associates ICAI Regn.No. 109983W Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

	The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized, or the deferred income tax liability is settled. Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.
2.19	**Segment Reporting**: The accounting policies adopted for segment reporting are in conformity with the accounting policies adopted for the company. The company's operating businesses are organized and managed separately according to the nature of products and services provided. The Company is engaged in the business of Manufacturing & Assembling of Electric Bicycles & Scooters.
2.20	**Provisions, Contingent Liabilities:**
1.	**Provisions** Provision is recognized in the accounts when there is a present obligation as a result of past event(s), and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provisions based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.
2.	**Contingent liabilities** Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

ICAI Regn.No. 109983W Sharp & Associates Chartered Accountants

ONE E-MOBILITY PRIVATE LIMITED Regd. office Nagarwadi CHAKAN

3.	**Significant accounting judgments, estimates and assumptions.** The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, and the accompanying disclosures. These judgments, estimates and assumptions are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances. This note provides an overview of the areas that involve a higher degree of judgments or complexities and of items which are more likely to be materially adjusted due to estimates and assumptions to be different than those originally assessed. Detailed information about each of these judgments, estimates and assumptions is mentioned below. These Judgments, estimates and assumptions are continually evaluated.
2.21	**Leases** The Company assesses whether a contract contains a lease, at the inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether, (i) the contract involves the use of identified asset; (ii) the Company has substantially all of the economic benefits from the use of the asset through the period of lease and (iii) the Company has right to direct the use of the asset **As a lessee** The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. Certain lease arrangements include the option to extend or terminate the lease before the end of the lease term. The right-of-use assets and lease liabilities include these options when it is reasonably certain that the option will be exercised. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability. The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'Financials Liabilities' in the financial statements (Refer Note 13, Note 18).

Shah & Taliwal Associates Chartered Accountants ICAI Regn.No. 109963W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, and Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The lease liability is subsequently measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Lease payments have been classified as financing activities in Statement of Cash Flow.

Lease payments included in the measurement of the lease liability comprise the following:
– Fixed payments, including in-substance fixed payments less any lease incentives receivable;

– Variable lease payments that depend on a rate, initially measured using the rate as at the commencement date;

– Amounts expected to be payable under a residual value guarantee; and

– The exercise price of a purchase option if the Company is reasonably certain to exercise that option and.

– Payments of penalties for terminating the lease, if the lease term reflects the Company exercising that option

The lease liability is measured at amortized cost using the effective interest method. If the rate cannot be determined readily, the Company's incremental borrowing rate is used, being the rate that the Company would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company:

– Where possible, uses recent third-party financing received as a starting point, adjusted to reflect changes in financing conditions since third party financing was received

– Makes adjustments specific to the lease e.g. term, country, currency and security

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability of each period.

Sharp & Tannan Associates ICAI Regn.No. 109983W S&TA Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

	As a lessor Lease income from operating leases where the Company is a lessor is recognized in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature. The Company did not need to make any adjustments to the accounting for assets held as lessor under operating lease as a result of the adoption of Ind AS 116. **Short-term leases and leases of low-value assets** The Company has elected not to recognize right-of-use assets and lease liabilities for short term leases that have a lease term of 12 months. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.
3.1	**Going Concern assumptions:** The Company has earned a Loss (before exceptional item) of Rs. (83.24) lakhs for the financial year ended 31 March 2025 and the Company's current liabilities exceeds its current assets by Rs.1,840.89 lakhs as at 31 March 2025. The Company's management has carried out an assessment of the Company's financial performance and expects the Company to achieve significant improvements in its financial performance with effect from financial year ending 31 March 2025 to enable it to continue its operations and to meet its liabilities as and when they fall due. Various initiatives undertaken by the Company in relation to cost synergies, revenue management opportunities, enhanced ancillary revenues, sale of property, plant, and Equipment's, rescheduling of loans will result in improvement in operating cash inflow in coming years. Further, continued thrust to improve operational efficiency and initiatives to raise funds are expected to result in sustainable cash flows. On the basis of the above assessment and considering the financial and other support from promoter directors, the Directors of the Company are of the opinion that the preparation of the financial statements of the Company on a going concern basis is appropriate which contemplates realization of assets and settlement of liabilities in the normal course of business.
3.2	**Segment Reporting:** Ind AS 108 Operating Segments requires Management to determine the reportable segments for the purpose of disclosure in financial statements based on the internal reporting reviewed by Chief Operating Decision Maker (CODM) to assess performance and allocate resources. Operating segments are defined as 'Business Units' of the Company about which separate financial information is available that is evaluated regularly by the chief operating decision- maker, or decision-making group, in deciding how to allocate resources and in assessing performance.

Sharp & Tandon Associates Chartered Accountants ICAI Regn.No. 109963W S&TA

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

	The Company operates in the Manufacture & Assembling segment. The management considers that these business units have similar economic characteristics like the nature of the products and services, the nature of the production processes and nature of the regulatory environment etc. Based on the management analysis, the Company has only one operating segment, so no separate segment report is given. The principal geographical areas in which the Company operates are India and other countries.
3.3	**Significant estimates and assumptions:** **Impairment of Property, plant and equipment: Key assumptions used.** The management has assessed the current and forecasted financial performance of the Company and the current market value of the assets to determine whether the carrying value of property, plant and equipment has suffered any impairment. Impairment assessment is based on estimates of future financial performance or opinions that may represent reasonable expectations at a particular point of time. Such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, that events will occur, or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary and the variations may be material.
3.4	**Defined benefit plan:** The cost of the defined benefit gratuity plan, other retirement benefits, the present value of the gratuity obligation and other retirement benefit obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on Indian Assured Lives Mortality (2006-08) Ultimate. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates. Further details about gratuity obligations are given in Note. No. 35
3.5	**Fair valuation of financial instruments:** When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Sharp & Tennan Associates ICAI Regn.No. 109883W S&TA Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

3.6	**Impairment of financial assets:** The impairment provisions for financial assets disclosed based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the companies past history, existing market conditions as well as forward looking estimates at the end of each reporting period.
3.7	**Recent pronouncements:** Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended March 31, 2025, MCA has notified Ind AS 117 - Insurance Contracts and amendments to Ind AS 116 – Leases, relating to sale and lease back transactions, applicable from April 1, 2024. The Company has assessed that there is no significant impact on its financial statements. On May 9, 2025, MCA notifies the amendments to Ind AS 21 - Effects of Changes in Foreign Exchange Rates. These amendments aim to provide clearer guidance on assessing currency exchangeability and estimating exchange rates when currencies are not readily exchangeable. The amendments are effective for annual periods beginning on or after April 1, 2025. The Company is currently assessing the probable impact of these amendments on its financial statements.

The carrying amount of trade receivables, cash and cash equivalent, Bank balances other than cash and cash equivalent, other current financial assets, short term borrowings, trade payables and other financial liabilities are considered to be same as their fair values, due to their short term nature.

Valuation technique used to determine fair value

Specific valuation technique used to value financial instruments include

- Fair value of forward foreign exchange contracts is determined using forward exchange rate as at the balance sheet date
- Fair value of remaining financial instruments is determined using discounted cash flow analysis

Valuation processes

For valuation of financial assets and liabilities, the finance department of the company includes a team that performs the valuation of financial assets and liabilities required for financial reporting purposes, including level 3 fair values. Discussions of valuation processes and results are held between the CFO and the valuation team on regular basis.

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S.No.313/314 Nanekarwadi CHAKAN PUNE-410501

Sharp & Tannan Associates Chartered Accountants ICAI Regn.No. 109983W S&TA

Note 29: Financial risk management

The Company's financial risk management is an integral part of how to plan and execute its business strategies. the Company is exposed primarily to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the Company, the Company has a system based approach and procedures and internal financial controls aimed at ensuring early identification, evaluation and management of key financial risks which covers risks associated with the financial assets and liabilities such as credit risks, liquidity risk etc. The risk management framework aims to achieve greater predictability to earnings by determining the financial value of the expected earnings in advance. Company's risk management framework has the objective of ensuring that such risks are managed within acceptable and approved risk parameters in a disciplined and consistent manner and in compliance with applicable regulation. It also seeks to drive accountability in this regard.

(A) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Liquidity risk refers to the probability of loss arising from a situation where there will not be enough cash and/or cash equivalents to meet the needs of depositors and borrowers, sale of illiquid assets will yield less than their fair value and illiquid assets will not be sold at the desired time due to lack of buyers. The primary objective of liquidity management is to provide for sufficient cash and cash equivalents at all times and any place in the world to enable us to meet our payment obligations.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet this.

Maturities of financial liabilities

The tables below analyses the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities.

The amounts disclosed in the table are the contractual undiscounted cash flows.

Contractual maturities of financial liabilities	Upto 1 Year	Between 1 and 2 years	Between 2 years and above	Total
March 31 2025				
Non-derivatives				
Borrowings	2,036.41	-	-	2,036.41
Lease Liability	26.78	32.79	9.94	69.51
Trade payables	28.72	-	-	28.72
Other financial liabilities	12.72	-	-	12.72
Total non-derivative liabilities	2,104.64	32.79	9.94	2,146.37
Derivatives				
Foreign exchange forward contracts	-	-	-	-
Total derivative liabilities	-	-	-	-

₹ in Lakhs

Contractual maturities of financial liabilities	Upto 1 Year	Between 1 and 2 years	Between 2 years and	Total
March 31 2024				
Non-derivatives				
Borrowings	1,506.38	-	-	1,506.38
Lease Liability	20.63	26.78	41.73	89.14
Trade payables	29.62	-	-	29.62
Other financial liabilities	9.04	-	-	9.04
Total non-derivative liabilities	1,565.68	26.78	41.73	1,634.19
Derivatives				
Foreign exchange forward contracts	-	-	-	-
Total derivative liabilities	-	-	-	-

(B) Market risk

Market risk is the risk of any loss in future earnings, in realizable fair values or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the, foreign currency exchange rates, liquidity and other market changes. Financial instruments affected by market risk include loans and borrowings, deposits, FVTOCI investmeva.

(a) Interest rate risk

The company has fixed rate borrowing and variable rate borrowings in order to obtain more efficient leverage. The fixed rate borrowings are carried at amortized cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates. Floating rate debt results in cash flow interest rate risk. The company has taken both interest rate risk debts for managing its liquidity and day to day requirements of the funds.

The exposure of the borrowings [long term and short term (excluding bill discounting receivable)] to interest rate changes at the end of the reporting period are as follows :

₹ in Lakhs

Particular	31-Mar-25	31-Mar-24
	₹	₹
Variable Rate Borrowings	-	-
Fixed Rate Borrowings	2,036.41	1,506.38
Total Borrowings	**2,036.41**	**1,506.38**

As at the end of the reporting period, the Company had the following variable rate borrowings and interest rate swaps contracts outstanding's

	As at March 31, 2025		
Particulars	Weighted average interest rate	Balance (₹)	% of total loans
Bank loans, cash credits, working capital loans	0.00%	-	0.00%
Net exposure to cash flow interest rate risk		-	

	As at March 31, 2024		
Particulars	Weighted average interest rate	Balance (₹)	% of total loans
Bank loans, cash credits, working capital loans	0.00%	-	0.00%
Net exposure to cash flow interest rate risk		-	

The percentage of total loans shows the proportion of loans that are currently at variable rates in relation to the total amount of borrowings.

Sensitivity Analysis:

The Company does not have any variable rate borrowings, hence there is no exposure to interest rate risk and the end of reporting period.

(b) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency).

The Company's exposure to foreign currency risk at the end of the reporting period expressed in INR, are as follows

₹ in Lakhs

Particular	As at March 31, 2025	As at March 31, 2024
	₹	₹
Trade Payables (Advance)	-	-
USD	-	-

Sharp & Tandon Associates ICAI Regn.No. 109983W S&TA Chartered Accountants

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S No.313/314 Mankarwadi CHAKAN PUNE-410501

(C) Credit risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses both the direct risk of default and the risk of deterioration of creditworthiness. Credit risk arises from cash and cash equivalents, other balances and deposits with bank and financial institutions and trade receivables, derivative financial instruments and financial guarantees.

Credit risk management

For banks and financial institutions, only high rated banks/institutions are accepted.

For other financial assets, the Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the counterparty ability to meet its obligations
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the counterparty ability to meet its obligations
- significant increase in credit risk on other financial instruments of the same counterparty
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements

In general, it is presumed that credit risk has significantly increased since initial recognition if the payments are more than 90 days past due.
A default on a financial asset is when the counterparty fails to make contractual payments within 365 days of when they fall due. This definition of default is determined by considering the business environment in which entity operates and other macro-economic factors.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. None of the Company's cash equivalents, including time deposits with banks, are past due or impaired. Regarding trade receivables and other receivables, and other financial assets that are neither impaired nor past due, there were no indications as at March 31, 2025, that defaults in payment obligations will occur.

The Company follows 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date) model for recognition of impairment loss on financial assets measured at amortised cost other than trade receivables. The Company follows lifetime expected credit loss model (simplified approach) for recognition of impairment loss on trade receivables.

The ageing of trade receivable as on balance sheet date is given below. The age analysis has been considered from the due date.

Rs. In Lakhs

Particular	As at March 31, 2025			As at March 31, 2024

Overdue more than 6 months	1.31	-	1.31	0.74	-	0.74
Total	**2.38**	-	**2.38**	**2.17**	-	**2.17**

Note No. 30: Capital Management

The Company's objectives when managing capital are to:
• To provide maximum returns to shareholders and benefits for other stakeholders
• To Maintain an optimal capital structure to reduce the cost of capital.
The Company determines the amount of capital required on the basis of annual operating plans, long-term product and maintaining other strategic investment plans. The funding requirements are met through equity. The Company manages its capital structure and make adjustments considering the economic environment, the maturity profile of the overall debt of the company and the requirement of the financial covenants.

Note :- Dues to Micro and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors.

Notes 35: Corporate social responsibility

The Company does not meet the criteria specified in sub section (1) of section 135 of the Companies Act, 2013, read with Companies [Corporate Social Responsibility (CSR)] Rules, 2014. Therefore it is not required to incur any expenditure on account of CSR activities during the year.

Note 36 : Income Tax & Deferred Tax

A. Income Tax

The Company does not have taxable income on current and previous year and hence no tax expenses have been recognised. Further since it is not probable that future taxable amounts will be available to utilize the deferred tax assets in respect of following unused tax losses and unabsorbed depreciation, no deferred tax assets have been recognised except for tax paid under Minimum Alternate Tax (MAT) under Income Tax Act 1961.

AUTOLINE E-MOBILITY PRIVATE LIMITED Regd. office S. No 313/314 Nanekarwadi CHAKAN PUNE-410501

Note:

Deferred tax credit related to carried forward losses as per Income Tax records have not been recognized in the absence of virtual certainty of its usage in coming years due to the business conditions of the Company. The credit would be accounted for in the year of the actual set-off claim of the carry-forward losses through the income tax return.

Sharp & Tannan ICAI Regn No. 109983W S&TP Chartered Accountants

Notes 37: Employee Benefits

(A) Defined benefit plans
The Company offers the following employee benefit schemes to its employees:
Gratuity

The Company provides for gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn salary per month computed proportionately for 15 days salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Company makes contributions to recognised funds in India. The Company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Sensitivity analysis

Sensitivity analysis indicates the influence of a reasonable change in certain significant assumptions on the outcome of the Present Value of obligation (PVO) and aids in understanding the uncertainty of reported amounts. Sensitivity analysis is done by varying one parameter at a time and studying its impact.

The sensitivity of the Present Value of obligation to changes in the weighted principal assumptions is as follows:

Change in assumptions and impact on Present Value of obligation as at March 31, 2025 ₹ In Lakhs

Particulars	Change in assumption (in %)	Impact on defined benefit obligation (in %)	
		Increase in assumption, Increase/ (Decrease) in liability	Decrease in assumption, Increase/ (Decrease) in liability
Discount rate	1.00%	(0.48)	0.60
Salary growth rate	1.00%	0.54	(0.45)
Withdrawal Rate	1.00%	(0.06)	0.07

Comparative Figures

Change in assumptions and impact on Present Value of obligation as at March 31, 2024 ₹ In Lakhs

Particulars	Change in assumption (in %)	Impact on defined benefit obligation (in %)	
		Increase in assumption, Increase/ (Decrease) in liability	Decrease in assumption, Increase/ (Decrease) in liability
Discount rate	1.00%	(0.55)	0.66
Salary growth rate	1.00%	0.60	(0.51)
Withdrawal Rate	1.00%	(0.04)	0.04

Category of planned asset

Particular	As at March 31, 2025	As at March 31, 2024
Funds Managed by insurer	0%	0%

The Company has not funded the liability as on March 31, 2025

The following payments are expected contributions to defined benefit plan in future years

The weighted average duration of the plan is 18.62 years

The expected future benefit payments are as follows: ₹ In Lakhs

Particulars	As at March 31, 2025	As at March 31, 2024
Defined benefit obligation		
Less than a year	0.07	0.06
Between 1-2 years	0.61	0.07
Between 2-5 years	1.76	2.44
Over 5 years	1.18	2.09

RISK EXPOSURE AND ASSET LIABILITY MATCHING

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below :

1. Interest rate risk:

The defined benefit obligation is calculated using a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

2. Salary inflation risk:

Higher than expected increases in salary will increase the defined benefit obligation.

3. Asset-Liability Mismatch Risk : Risk arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the Company is successfully able to neutralize valuation swings caused by interest rate movements. Hence Companies are encouraged to adopt asset liability management.

4. Discount Rate Risk : Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

5. Future Salary Escalation and Inflation Risk : Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

6. Unfunded Plan Risk : This represents unmanaged risk and growing liability. There is an inherent risk here that the company may default on paying the benefits in adverse circumstances. Funding the plan removes volatility in company's financials and also benefit risk through return on the funds made available for the plan.

7. Demographic risk:

For example,as the plan is open to new entrants, an increase in membership will increase the defined benefit obligation. Also,the plan only provides benefits upon completion of a vesting criteria. Therefore, if turnover rates increase then the liability will tend to fall as fewer employees reach vesting period.

Defined Contribution Plans

The company has certain defined contribution plans. Contributions are made to provident fund in India at the rate of 12% as per local regulations. The contributions are made to the provident fund administered by the government. The obligation of the company is limited to the amount contributed and it has no further contractual or any constructive obligation.The company also has liability to contribute to other defined contribution plans. The company has recognised the following amounts in the statement of Profit and Loss.

₹ In Lakhs

Particulars	As at March 31, 2025	As at March 31, 2024
Contribution to Provident Fund	2.59	3.62
Contribution to Employee's State Insurance scheme	0.13	0.18

Note 38 : Leases

(a) Right-of-use assets

This note provides for information for leases where the company is a lessee. The company has leased Building,Furniture and Fixtures properties . The Company has applied Ind AS 116 using the modified retrospective approach method with effect from April 01, 2019 to all leases subject to exemptions provided under Paragraph 5 of Ind AS 116.

(i) Amounts recognized in Balance Sheet:

Right-of-use assets:

The changes in the carrying value of ROU assets for the year ended March 31, 2025 are as follows

₹ in Lakhs

Particulars	Building	Furniture & Fixtures	Total
Gross carring amount as at April 01, 2024	57.94	21.73	79.66
Addition during the year	-	-	-
Disposals	-	-	-
Deletion / Adjustment due to lease modification	-	-	-
Depreciation	17.60	6.60	24.20
Net carring amount as at March 31, 2025	**40.34**	**15.13**	**55.46**
Gross carring amount as at April 01, 2023	76.63	28.73	105.36
Addition during the year	-	-	-
Disposals	-	-	-
Deletion / Adjustment due to lease modification	0.41	0.15	0.56
Depreciation	18.28	6.85	25.14
Net carring amount as at March 31, 2024	**57.94**	**21.73**	**79.66**

The aggregate depreciation expense on ROU assets is included under depreciation and amortization expense in the Statement of Profit and Loss.

The break-up of current and non-current lease liabilities as at March 31, 2025 is as follows

₹ in Lakhs

Particulars	March 31, 2025	March 31, 2024
Lease Liabilities:		
Current	26.78	20.63
Non-current	41.73	68.51
Total	**68.51**	**89.14**

The movement in lease liabilities during the year ended March 31, 2025 is as follows :

₹ in Lakhs

Particulars	March 31, 2025	March 31, 2024
Balance at the beginning of the year	**89.14**	**100.92**
Additions	-	-
Disposals	-	-
Finance cost accrued during the period	9.48	12.62
Deletion / Adjustment due to lease modification	-	-
Payment of lease liabilities	30.11	33.40
Balance at the end of the year	**68.51**	**89.14**

The maturity analysis of lease liabilities as at March 31, 2025

₹ in Lakhs

Particulars	March 31, 2025	March 31, 2024
Less than one year	26.78	20.63
One to five years	41.73	68.51
More than five years	-	-
Total	**68.51**	**89.14**

The Company does not face a significant liquidity risk with regard to its lease liabilities as the current assets are sufficient to meet the obligations related to lease liabilities as and when they fall due.

(ii) Variable Lease payments

Estimation uncertainty arising from variable lease payments

There were no leases with variable lease payments.

(iii) Extension and termination options

Extension and termination options are considered in a number of leases across the Company. These terms are used to maximise operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable on a mutual consideration between lessor and the Company. Therefore the extension and termination option is not considered.

(iv)Residual value guarantees

There were no leases with residual value guarantees.

(v)This note provides for information for leases where the company is a lessee. The company has leased Building / Furniture properties . The Company has applied Ind AS 116 to all leases subject to exemptions provided under Paragraph 5 of Ind AS 116.

(b) Interest Expense on Lease Liabilities

₹ in Lakhs

Particulars	March 31, 2025	March 31, 2024
Interest on lease liabilities	9.48	12.62

(c) Amount recognised in the statement of Cash flow

The total cash outflow for leases (including interest)for the year ended March 31, 2025 was Rs.30.11 L (March 31, 2024 Rs.33.40L)

Note 39 :

As per the Ministry of Corporate Affairs (MCA) notification, proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014, for the financial year commencing April 1, 2023, every company which uses accounting software for maintaining its books of account, shall use only such accounting software which has a feature of recording audit trail of each and every transaction, creating an edit log of each change made in the books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled. The interpretation and guidance on what level edit log and audit trail needs to be maintained evolved during the year and continues to evolve.

The Company did not maintain an operational audit trail functionality throughout the year at both the application and database levels for all relevant transactions recorded in its software systems. Furthermore, the accounting software currently in use does not possess the capability to record an audit trail.
